

# **MST - MSLT**

## **Table Top power strapping machines for plastic strapping**

- **Low Cost**
- **Mobile**
- **Applies economical plastic strapping**
- **Ready for use in seconds**
- **A quality product made by Signode**

# Facts about the MST and MSLT

## Operation

The strap length is pre-selected and is automatically fed out. The operator takes the strap and places it around the package. The strap is then introduced into the sealing head. The strap is then automatically sealed, cut off and re-fed from the machine to the pre-selected length (minimum package width 65 mm).

## General description

The MST - MSLT are simple, low cost table-top strapping machines for low and medium volume applications and consist of:

- Solid robust construction with stainless-steel table top, with integrated package stop
- Simple to use control panel
- Large locking wheels for mobility
- Minimum number of moving parts for reliability
- Simple and easy maintenance
- Warm up time of only 30 seconds
- Long-life heatknife
- Solid-state electronics
- High-quality electrical components
- When not used for 15 seconds the motor will automatically cut-off to save power and extend the working life of the motor
- When strap is re-fed into the strapping head the machine automatically re-starts
- Large-capacity integral strap dispenser
- Simple adjustment for strap tension
- Door and table-top safety switches

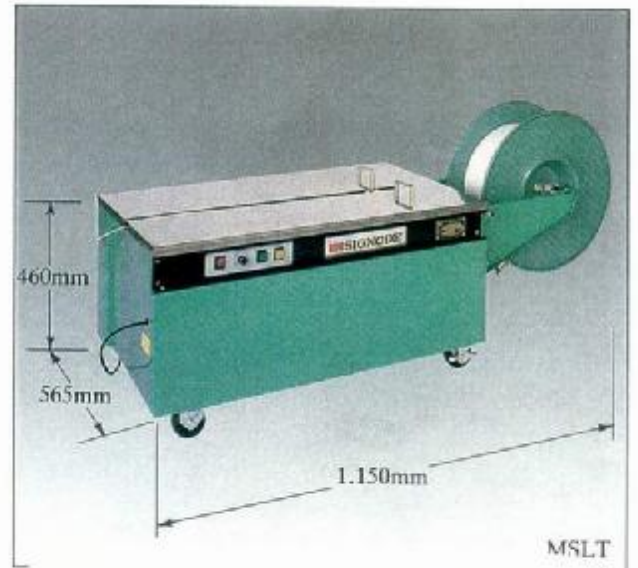

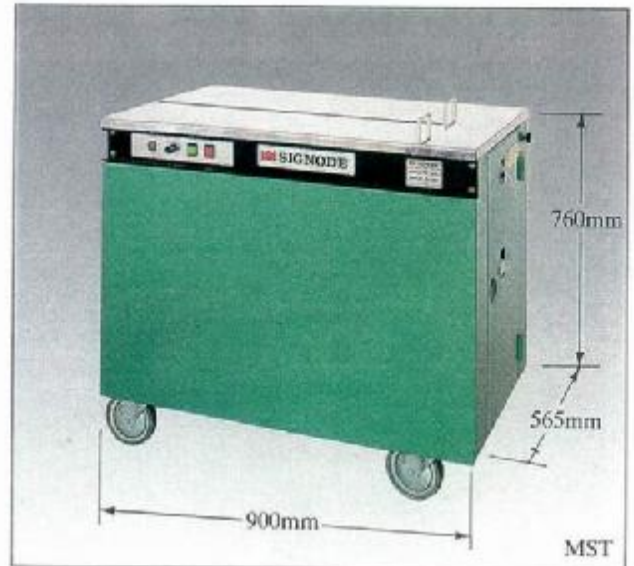

## Power Requirements

Voltage 220V, 1Ph, 50Hz

Control Voltage 24V  
Conforms to VDE electrical standards

Strapping Material	Width	Break Strength	Metres per Coil
Type 610W	9,2 mm	ca 1210N	3000

Shipping Weight ca 103 kg
